

# Publication Approval and Collection System

## Streamlining the publishing process

Developed with authors and administrators in mind, the new CRC CARE online Publication Approval and Collection System (PACS) streamlines the publishing process making it easier at every stage.

This online program can be customised and tailored to your CRC's specific needs, incorporating your brand, logo and business details – just ask us how.

Our advanced online system has allowed us to simplify and improve the process, moving away from the manual paper-based system still used by many CRCs and research institutions.

The CRC CARE PACS has a plethora of user-friendly and time-saving features that enable easy collation of publication and author details.

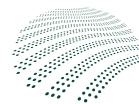

Time saving

Greater control

Real-time access

Email alerts

Document tracking

**CRC CARE**  
*A safer, cleaner  
environmental future*

# Key benefits of PACS include:

## Email Alerts

- Authors are reminded via email to provide final publication details or to resubmit their request.
- Program Leaders, IP Managers and Managing Directors are alerted to approve requests.

## Document Tracking

- See who logs on and when.
- Identify delays and bottlenecks.

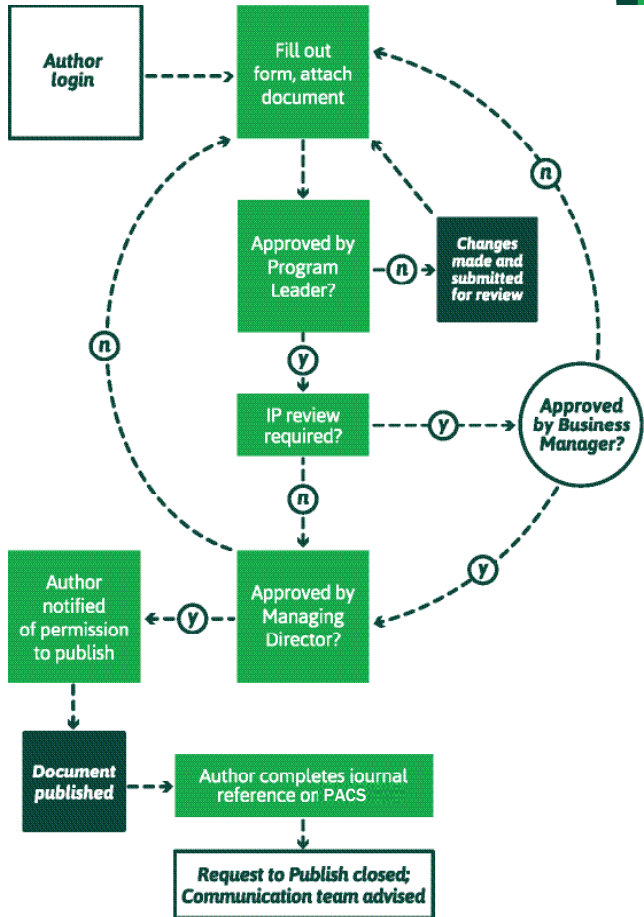

## Reporting

- Reports are at your fingertips and are easy to generate. Export monthly or quarterly reports at any time to determine the status of requested publications and publisher acceptances.
- System Administrators can even submit papers on behalf of Authors, allowing greater flexibility, especially when Authors are travelling.
- Authors can assemble a full list of their submissions.

## Training

- Benefit from training resources including a suite of user manuals and video downloads that promote a greater understanding of intellectual property.
